Door Tennis and others Spreadsheet

a.k.a. Random Tennises spreadsheet

Spreadsheet editors: CubeyCarter, RaymanChrome, ApproximateOstrich, ClubBBC TV, lucifiedvertices, Ivan, dillon, Liam, Slabsten, Mask9999 & obscref

This spreadsheet is for many tennises that are/were on YouTube, since making separate spreadsheets for each tennis would be devastating and annoying. It is also about YouTube channels/lost videos.

There are currently 254 tennis sheets. Date format: DD.MM.YYYY [example: 30.04.2020]

Recommended to view this on desktop. Mobile/HTMLView do not work as great.

29.08.2023	Nearly every sheet has a playlist/video attached to it at this point. The only ones that don't are either because I'm lazy, one doesn't exist, or one physically can't exist.	obscref	Spreadsheet update

02.10.2023	Google fucking took down the 'ytp master 4000' playlist on obscrecyclebin for hate speech meanwhile they proceed to leave a bunch of botted pornographic playlists up. Can't upload on it for a week now so atm any future uploads will go to obscreup 2 update 06:30pm - I likely would have left the channel inactive longer than the strike upload restriction countdown (upd 24.11.2023 and if i recall correctly i did) so i don't really think it'd affect the channel anyway. I have also removed the 'ytp tennis gangsta 7001' playlist entirely incase youtube does a stupid and takes that down too. Sorry if there was anything in the playlist that anyone wanted to archive I'm lazy	obscref	Lost media news? [44]			

09.10.2023	Just discovered I had a facebook account from 2016 for some reason... I'm assuming this was made to unlock Mega Photo filters since iirc that was a feature? If not, then I'm not sure why it exists. There's really nothing interesting on this account though so don't bother going through it (i'm also mainly using this account to bypass facebooks weird ass ratelimit "please log in to continue" thing because i was trying to investigate vivavideo's facebook account) also btw obscrecyclebin strike has passed woohoo	obscref	Good news to ignore			
23.11.2023	lassie's online dumpster has been falsely terminated for "spam and deceptive practices". This isn't the first time he has been falsely terminated. Currently trying to get a Google Takeout of this account.	RaymanChrome	Lost media news

10.01.2024	Forgot to mention this, but a bunch of old YouTubeLogo videos have now been finally sent after 4 years. This also means that the system128 lost videos sheet now has a separate listing for videos with unknown upload dates, as found in the list of archived videos.	RaymanChrome	Lost media recovery			
24.01.2024	Spreadsheet ownership has been transferred to me! Don't worry, this doesn't mean that CubeyCarter no longer edits the sheet. The reason why I am the new owner is so we could block DCNFY's emails more efficiently. I have a method of blocking him from Google Sheets which should hopefully work.	RaymanChrome	Spreadsheet update			
09.02.2024	google this fucking comment ui update sucks revert it N;OW [45]	obscref	Good news to ignore

11.02.2024	Warning for all spreadsheet makers: cdn.discordapp.com and media.discordapp.net are NO LONGER RELIABLE WEBSITES. If you remove the expiry tags (1 week), the links say "This content is no longer available". It is recommended to store them on a different website e.g. catbox.moe or tixte.co. For all the currently remaining cdn.discordapp.com links on here, use archive.ph to archive them.	RaymanChrome	Lost media news			
13.02.2024	very important playlist	obscref	Good news to ignore			

23.02.2024	following 11.02.2024, discord just NOW decided to go through with fucking up all of the old links (previously it was only the newer ones fucking up). luckily they're still accessible by pasting them into a random channel/group although that;s not really a good solution so im gonna go through all of this shit and try to mirror it to catbox. UPD 01.08.2024 - We never clarified this, but the expiry timeframe is actually 24hrs. Doesnt matter since we replaced them anyway but still figured it was worth mentioning -obscref update: i decided to move them to a drive folder instead, which you can find here https://drive.google.com/drive/folders/1fyUsEeimfjrvjr_378jl2wsUgn0UmmYF	obscref	Lost media news			
19.03.2024	New stuff has been added to the LanceAnimaniacs research spreadsheet, which includes undocumented videos, as well as corrected upload dates/titles. This was made possible due to ApproximateOstrich sending us all the upload notifications he could get in .EML form. It is tedious to sort through these, but it's possible. 27.05.2024	Considering deleting every video from the set of vglvrti alts at some point (mainly the ironic ones that are likely to put this account in jeopardy). They will still be hosted on Internet Archive so feel free to reup them whenever/if I do decide to delete them. UPDATE 5/29/24 - This has now been done. [47]	obscref	Lost media news			

29.05.2024	The snully og path playlist on obscrecyclebin has been temporarily privated until I can fucking fix the order from the shitfest its currently in. On top of this google seems to have fucked up the queue feature in a way where it cant go past 200/201 videos (unless im just stupid) so i can't use cmedia's playlist to atleast get it somewhat normal update: its not private anymore and i've put a note in the title & desc saying its broken. taking a break for now but over half of them are currently sorted atleast somewhat correctly. for now rely on cmedia's somewhat outdated orig path playlist + my revival canon playlist until i have it like not entirely fucked update 2: Fuck you neal mohan i won :middlefinger: also there is a backup of the snully playlist on obscreup2 now incase i fuck it up again	obscref	uh idk what to mark this as

Videos I (obscref) remember the concept of but can't be bothered to remember them fully or properly document them:
Several variants of [X] Klasky Csupos (most obligatory: 307, uploaded to JB572 / T2017OT)
Livestreams that were recorded on a camera and posted to Minhea's channel whilst i still had access to it << These might've been privated, not deleted
Videos similar to this (uploaded to JB572 / T2017OT)
Contributions to old Bandicam "[X] YTP" tennises under JB572 (except i think i recorded it with xbox's screen recorder instead) << oct 2016 bandicam videos found, end disproven? [1295]

Not necessarily "lost" but the effect from this has been removed since more remnants of YTVE got killed [1296] << Why did google even do this anyway it was pointless

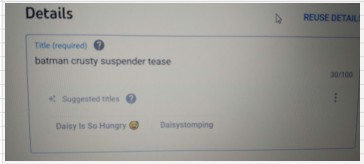
v is this an extension (not my screenshot)



^ - if it is i have no clue what the name of it would be, if it's not/if it's something yt's actually adding then they're probably putting it through a-b testing since i don't have it (yet?)

[1] Self-explanatory.

[2] Means that the video is missing, but uses a different video to restore a missing video.

[3] Means that the video won't be fully found.

[4] Means that the video is missing, but the project file for example (.veg) has been saved. The video could be restored, if it has the same videos and plugins used saved.

[5] slabsten's sheet is also technically a roster/tennis documentation sheet as well

[6] go to "sheets info / quick access" for the rest of them

these change randomly

[7] Self-explanatory.

[8] Rounds that haven't been made/claimed, or haven't been finished/started on yet.

Usually, no status (pink) is used as a replacement for this instead, but there are still cases where this status shows up.

[9] some of these used to be on here, however it was a bit cluttered

[10] Video that is either private or deleted.

[11] Means that the video was missing, but the video still had the thumbnail/preview saved, or there was another sort of screenshot available.

[12] non-tennis sheet, information about media editing software

This is currently being flagged by Google because they no likey crack software :(((

[13] holy shit theres so many what the fuck

[14] Means the status of this video is not known.

[15] proposal to replace this hyperlink
Maybe

[16] This status is used for when information hasn't been added to a row yet. Appears without text.

Yes status

[17] Satire/mega shitpost sheet [16+ and shit like that idfk this is google sheets who's gonna sue us]

meilin lee poop chain 1 - 10k rounds
meilin lee poop chain 1.5 - [finite number + 0.5] rounds
meilin lee poop chain 2 - didn't happen...yet
meilin lee poop chain 3 - ongoing, 34000 rounds

[18] 'Multple playlists' section is heavily outdated with removed tennis sheets playlists still being there & outdated playlists in there in general. Not fixing it because im lazy -obscref

[19] Aka the uktotrises tennis revival predictor. Whatever number it lands on will probably predict a revival from that channel in like the distant future or never or immediately

[20] move to "Every snully ripoff ever" sheet?
Also whenever i add it to the overview i need to disable edit access to everyone because it's still like that for some reason And then it was remo0ved from the overview

[21] aw8qn vs ApproximateOstrich vs AmberMadnazz vs Mihnea

[22] or just. read the fucking sheet name?

[23] also basically the self-tennis path since beyond n14 every round is made by obscref in a different trench coat each time

[24] Non-linear tennis (some rounds may've been skipped/have metadata oddities)

[25] No r27 does not count towards this

[26] another tennis before this existed (jan 2017) however system never made n2

...which is probably a good thing

[27] technically 2019 because thats when this started as a chain but you can't tell me what to do

[28] Non-linear tennis (some rounds may've been skipped/have metadata oddities)

[29] Why the hell does cubey try to make this tbytpers tennis roster i swear theres like 12 of his tennises on here

[30] all of the upload dates are lost but very likely this is when it took place

[31] rounds past erick's 224 are only documented on the dtaos rejects sheet (which was formerly documented on the william sheet)

[32] some of the rounds in this playlist might be unofficial, hard to tell since its impossible to base it off of anything

[33] move to propaganda sheet

[34] Non-linear tennis (some rounds may've been skipped/have metadata oddities)

[35] Outdated, some reuploads are unadded

[36] not sure if there's a vidlii playlist for it...

[37] Playlist so old that it still uses the hexadecimal ID

youtube bring this back immediately!!!

[38] Basically all that can be found has been found. Most of the activity it sees now is usually shitposts at the bottom of the sheet.

[39] A google drawing to document how long it would have been until they replaced the UI entirely was made around the same time this news was posted. https://docs.google.com/drawings/d/1csBT-YOFCbeD_Kyhh4pJcJsVmj1OTWOTmUjyLbJB6_s/edit - obscref

[40] this has occurred now; under "PG123Studios"

[41] His videos were near-immediately unprivated by Hori after this was posted.

Also idk how outdated stuff should be documented as (temporarily(?) using darker color to signify)

[42] YOU SUCKS!!!

[43] OUTDATED AS OF 23.11.2023

[44] Playlist MAY have had some stuff that I wanted to save/archive

[45] still think this is worse though - https://files.catbox.moe/h49ftf.PNG

[46] Not really that much of a problem but also this is fucking stupid

[47] and i mean delete because privating them would probably still give yt an excuse to flag them since its still on their servers

[48] Self-explanatory.

[49] Means that the video is missing, but uses a different video to restore a missing video.

[50] Means that the video won't be fully found.

[51] Means that the video is missing, but the project file for example (.veg) has been saved. The video could be restored, if it has the same videos

and plugins used saved.

[52] Self-explanatory.

[53] Rounds that haven't been made/claimed, or haven't been finished/started on yet.

Usually, no status (pink) is used as a replacement for this instead, but there are still cases where this status shows up.

[54] Rounds that have been finished in batch but not uploaded yet, or a round that is available on the site but unable to be viewed.

[55] Only available on a compilation of rounds for that specific tennis. (can be extracted/restored from it, however)

[56] Videos that are available on an alternative website (i.e: archive.org; google drive), but need to be mirrored to YouTube. Does not apply to videos that have been striked

[57] U cant have it. Someone remind me to write an actual description for this

[58] Video that is either private or deleted.

[59] Means that the video was missing, but the video still had the thumbnail/preview saved, or there was another sort of screenshot available.

[60] Means the status of this video is not known.

[61] This status is used for when information hasn't been added to a row yet. Appears without text.

[62] Means that the video is missing, but videos have contained the missing video used, and/or the video is remade by memory. This has been discarded in favor of the Restored status.

[63] Self-explanatory.

[64] Restorations that were done by AE Doodle Dash. Essentially a different way of saying "(shitty reupload-ish, eventually there might be a better one)".

Pretty sure this is only on the propaganda sheet but im putting it here incase we ever do use it somehow

[65] Means that the video has been reuploaded but not on YouTube.
Will appear as the normal Available status anyway, but will mention the offsite upload in some cases.

Superseded by "To be uploaded"?

[66] Means that the video is reuploaded but modified a bit. (e.g. removing parts, adding and editing)

Discarded in favor of mentioning the modifications as a seperate note.

[67] Means that nobody, not even the video maker themself has the file saved.
Discarded since there has been rarely any instances where this has came up.

[153] WHY THE DESCRIPTION NOT SAY "via YouTube Capture" THEN DUMBAS....

[154] h major round was supposedly made on september 12 so idk if that was an unofficial round

[155] it had more pizazz than that but you get the idea

[156] Most of ClassicBirch's rounds were uploaded under SNRYTP/AmberMadnazz

[157] Possibly the same upload date (or the day after it) as the previous round since M.K. usually responds to these almost instantly

[158] video shown in the front is likely a puzzle piece, the video behind it is the actual round

[159] His BR603 and BR1000-1002 (apparently) existed, but they were/have been considered unofficial.

[160] seemingly a throwaway account, however nobody knows who owns it atm

[161] The reason why it's age restricted is because Klaskey1 doesn't like his old videos that much so he decide to age restrict all of his old videos - cmedia

Found a email replying to one of my comments saying "cXcq0101: I also agree." from uktot - obscref

Assuming it was some fake bullshit account i stirred in with Js alt 2.0 dr ma shit

Also referring to the S84 screenshot: "2 years agao" would've been in like 2015 when the channel didn't even exist????? what fucking logic does THAT have??

upd 6/19/2023 for the above addition - yes theres technically a video uploaded to jb242 named "deleted videos from 2015" or some shit like that but 1) i was probably lying 2) the channel did technically exist throughout 2012-2017 however i believe i started uploading to it in 2016

[1202] Videos from this channel were uploaded from my mom's iPhone, they were deleted at some point and I have lost access to the gmail associated w/ JS Alt/3NCTOT - obscref

[1203] Worlds dumbest drama ever

I didn't even have problems with Slabsten at the time either I just wanted to start shit out of boredom

[1204] Video itself was found on Google Photos

[1205] Other proof of existance includes 2.0 deletion video and obscref's Gmail inbox

Could also been seen on an oldref video: https://www.youtube.com/watch?v=kJgoOeFOUTk

Too much fucking proof holy shit

[1206] https://www.youtube.com/@user-jy4kk6og5m/ (UCQj5vDBjTi0HnZSWfiO8OCA)

[1207] Audio removed from YT mirror incase they pull the same shit (i have severe trust issues)

[1208] Likely not the title but I have no other leads.

[1209] assuming

[1210] guessing based off a comment from the original jb242 account

by the way, the comment reads: "and yet I wanna kill myself and here I am, watching bfb intros AGAIN."

[1211] placeholder name until i find something that isn't "WhyAreYouEvenReadingThisLolIdkWhatToDoSolIljustd A" or "Robloxdynablocks2004" (which wouldn't work anyway because thats the 2017 name)

[1214] Actual title had to be shortened to fit character limit

[1215] I think it was flipped due to copyright paranoia as well, however I really think it doesn't matter if it's flipped or not since I don't think you can get struck down for this

[1223] Note from the Gmail inbox entry: Also has a comment w/ the first occurance of "sansdetta" being named "Vendetta" instead

[1224] "sweet dreams but i put kahoot music over it" "but I fixed the tempo" "but I added Joker's gun" "but I added the Tainted Love clap" but I added Chip The Ripper to rap along with the song but I added squidward hitting his head into the cash register

[1225] The actual row on here is referring to the redirect video; not the parison.

[1227] Unconfirmed. Guessing based off of the first comment I got for it.

[1245] Unconfirmed. This is just the date for the first comment I actually recieved on that video.

[1246] The only 2 that I remember that expanded the length to what it is were https://www.youtube.com/watch?v=uTbRthb3ins and https://www.youtube.com/watch?v=-KIhGqIb1cE

This should probably be moved to notes column instead

[1247] guessing

[1248] guessing

[1249] guessing

[1250] guessing. this could very well be wrong

[1251] obscref's guess

[1252] Not to be confused with the similarly titled one uploaded to Minecraft2017Editor

I'm not sure if this is the actual title at all, I just set it as where it's actually seen on

[1253] presumably around august 2016

[1254] presumably around august 2016

[1255] presumably around august 2016

[1256] presumably around august 2016

[1257] Don't remember if it was the actual effect name but I think it was something like that

There was probably some other stuff after "T-Major" but I can't remember any of it so

[1258] the title i'm remembering is definitely wrong because the actual title was some uncomprehendable bullshit

(e.g: iirc the sparta base name of it was the most random thing possible, it wasn't even real either)

most of the title from what i can remember is either
"ethan has a sparta [[can't remember this part]] remix",
"i have a sparta [[can't remember this part]] base remix",
or something similar to that

[1259] Basically, something that's similar to this: https://www.youtube.com/watch?v=PIsgxyTL9lE

[1260] shitty quality

[1265] Only email I have for this is a age-restriction in october 2020.

[1266] Moving the comment thread here:

series of them i remember the most: [random "rip name"] - createur08 in a nutshell

i think i made a playlist for that as well but deleted it

++++++++++++++++++++++++++

Update: found proof of its existence in a wayback archive page but there doesn't seem to be an actual archived page for the playlist itself [http://web.archive.org/web/20201015000554/https://www.youtube.com/channel/UCpicFaY2BScvnjTbyP-8VJQ/playlists?view=1&disable_polymer=1]

[1270] I also recalled this when editing some old ass google slides presentation i made 6 years ago - https://docs.google.com/presentation/d/1KJHXU63zGyGoaeQ9FOmz5euUrC_nH__3hu7mAmdazw4/edit?pli=1#slide=id.g244408130cc_0_942

[1271] Might've been in the Feb 2022 range

[1272] October 2017

[1273] probably close to the upload date for it's multirendering counterpart (April 22, 2016)

[1274] late 2017(?)

[1275] Gummy Bear International (most popular video during 1/1/2018)

[1276] Gummy Bear-related (2nd most popular video during 1/1/2018)

[1277] Gummy Bear-related (3rd most popular video during 1/1/2018)

[1278] Comparison (4th most popular video during 1/1/2018)

[1279] Comparison (5th most popular video during 1/1/2018)

[1280] The only email I have for this video is a age-restriction in august 2022; although the video was uploaded in 2019 (or maybe early 2020)

[1283] Q1 2017?

[1284] around feb 2017

[1285] I think I still uploaded stuff during that range on a mobile device

[1286] The only proof is the videos counter provided by Google when obscref went to delete that channel

[1287] placeholder name until i find something that isn't "WhyAreYouEvenReadingThisLolIdkWhatToDoSoIlljustd A" or "Robloxdynablocks2004" (which wouldn't work anyway because thats the 2017 name)

[1288] atleast somewhere around the middle of 2018

[1289] atleast somewhere around the middle of 2019

[1290] Early 2017?

[1291] btw the comment says this: "Hey, Robloxdynablocks2004 NewLol2009! I love your video! Keep it up. :) I want to start making YouTube videos soon, too. www.patreon.com/dominikyoutube It would be so great if you could support me with a dollar to get things started because I need equipment for my videos. There's no need to feel bad if you can't, I still think you're great and I wish you the best for you and your channel. This comment will be marked as spam because of the link, I'm sorry about that. Peace & Love, Dominik."

is that the origin of "newlolr" -rc
yeah pretty much ~obsc

[1292] placeholder name until i find something that isn't "WhyAreYouEvenReadingThisLolIdkWhatToDoSoIlljustd A" or "Robloxdynablocks2004" (which wouldn't work anyway because thats the 2017 name)

[1293] btw before someone asks: jb242 2.0 channel was recreated the same day i deleted it, and then i (may) have used it for a bit before abandoning it for :b:elete this / jb242 2017+ entirely.

[1294] This is still basically unpatched

[1295] update 7/27/2023: I think even after I downloaded bandicam i still chose to use xbox screen recorder so idk /shrug

[1296] Theres probably still a way to retrieve some of the variants with the effects on there such as yt-dlp + finding a videoplayback file that didn't get fucked when that update happened (most commonly 3gp but i sorta dont want the quality to suck as much ass)

someone tell essem to fix his ytdl web interface -rc

[1297] I'm pretty sure none of these were ever mirrored to YT but I thought I'd mention these incase they tie in somehow

Most of the reasons are probably because of copyright paranoia

[1298] felt like discord would've done something stupid somehow
